ABOUT ME

I'm a dedicated and responsible professional who takes great pride in producing exceptional results. My ambition is driven by the desire to take on increasingly complex challenges that foster both professional and personal growth. Fueled by curiosity, I'm always eager to explore new topics that stimulate me intellectually and help me continue advancing in my career.

WORK EXPERIENCE

● **Kapres Technology** Santa cruz de La Palma, Spain

Web programmer

18/05/2025 – 18/06/2025

During my internship, I worked on the development of a WordPress based website, which included both technical and design responsibilities. I troubleshooted issues related to PHP plugins, ensuring the site ran smoothly and securely. I was also involved in the design process, helping to create a user-friendly and visually appealing layout. Additionally, I set up and configured the email service to automate birthday greetings for forum members, integrating the system so that communications were reliable and personalized.

● **Metric Tristarinc** Cork, Ireland

Technician in Administrative Management

08/04/2024 – 20/06/2024

During my internship, I was responsible for testing and monitoring a web application to ensure smooth performance and reliability. I also kept track of company package logistics, making sure shipments were properly managed and documented.

EDUCATION AND TRAINING

● **10/09/2024 – CURRENT** Los Llanos de Aridane, Spain

Associate degree in Web App Development I.E.S Jose Maria Perez Pulido

During the Associate Degree in Web Application Development, I acquired solid training in both front-end and back-end technologies, as well as in the deployment, administration, and security of modern web applications. The program covered the use of markup languages for structuring web content, advanced styling with CSS and Bootstrap, and interface design principles for creating usable and accessible web layouts. I developed programming skills in Java, JavaScript, and PHP, and gained experience working with frameworks such as Laravel to build dynamic and scalable applications. The curriculum also included relational database management using MySQL, where I learned to design, implement, and optimize database schemas. In addition, I received training in administering Windows and Linux systems, along with core cybersecurity practices focused on secure coding and system protection. The program also covered deploying web applications, including preparing, configuring, and publishing them on server environments.
